

I lead UX for complex enterprise products — and I still design and ship.

Most recently I was Senior UX Manager at Appfire, where I co-led 35+ designers, researchers, and writers across products like BigPicture and 7pace, plus AI workstreams — design ops, research ops, and tools used by thousands of teams. Independently I shipped CostRadar.ai (live at [costradar.ai](#)): a profitability product with true-net P&L and AI that only acts after you Approve. I am looking for my next challenge in design leadership — roles where strategy, craft, and how the team runs all matter.
